PROJECTS

[CryptoTalk App](#) - PERN Stack (PostgreSQL, Express, React, Node), JavaScript

This web application provides educational resources about cryptocurrencies and uses the PERN stack with full CRUD.

- Worked collaboratively in a team, utilizing GitHub to maintain code on multiple branches during development.
- Planned the entire app and additional features from start to finish, and deployed the app using Netlify and Heroku.
- Built and integrated a one-to-many table relationship in the backend, to be used on the frontend.

[CTA Store App](#) - PERN Stack (PostgreSQL, Express, React, Node), JavaScript

This project was to build an e-commerce web application using the PERN stack with full CRUD operations.

- Used Express and Postgres to build the backend. Used React to build the frontend.
- Allows a user to create, read, update, and delete products. Additional feature: shopping cart.
- Deployed the app using Netlify and Heroku.

[Budgeting App](#) - PERN Stack (PostgreSQL, Express, React, Node), JavaScript

This budgeting application utilizes the PERN stack with full CRUD. The frontend is a React app using RESTful routes.

- Allows a user to create, read, update and delete transactions.
- Used helper functions to change the color of transactions to show if the amount is above \$1,000 or below \$0.
- Additional feature: adding the bank account total to the navbar so the user can always see how much money they have.
